MISSISSIPPI LAND BANK, ACA

2024
Quarterly Report
Second Quarter

MISSISSIPPI LAND BANK

PART OF THE FARM CREDIT SYSTEM

For the Quarter Ended June 30, 2024

REPORT OF MANAGEMENT

The consolidated financial statements of Mississippi Land Bank, ACA (Association) are prepared by management, who is responsible for the statements' integrity and objectivity, including amounts that must necessarily be based on judgments and estimates. The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America. Other financial information included in the annual report is consistent with that in the consolidated financial statements.

To meet its responsibility for reliable financial information, management depends on the Farm Credit Bank of Texas' and the Association's accounting and internal control systems, which have been designed to provide reasonable, but not absolute, assurance that assets are safeguarded, and transactions are properly authorized and recorded. The systems have been designed to recognize that the cost of controls must be related to the benefits derived. The board of directors has overall responsibility for the Association's systems of internal control and financial reporting. The board consults regularly with management and reviews the results of the audits and examinations referred to previously.

The undersigned certify that we have reviewed this report, that it has been prepared in accordance with all applicable statutory or regulatory requirements, and that the information contained herein is true, accurate and complete to the best of our knowledge and belief.

Mac Alan Blaine, Chairman, Board of Directors

MISSISSIPPI LAND BANK, ACA
MANAGEMENT'S DISCUSSION AND ANALYSIS

The following commentary reviews the financial performance of the Mississippi Land Bank, ACA, referred to as the Association, for the quarter ended June 30, 2024. These comments should be read in conjunction with the accompanying financial statements and the December 31, 2023 Annual Report to Stockholders.

The Association is a member of the Farm Credit System (System), a nationwide network of cooperatively owned financial institutions established by and subject to the provisions of the Farm Credit Act of 1971, as amended, and the regulations of the Farm Credit Administration (FCA) promulgated thereunder.

The consolidated financial statements comprise the operations of the ACA and its wholly-owned subsidiaries. The consolidated financial statements were prepared under the oversight of the Association's audit committee.

Significant Events

In both February 2024 and 2023, the Association paid to its stockholders a cash patronage of $7,500,000, which was declared by the board of directors in December 2023 and 2022, respectively.

Changes in Senior Officers

On January 11, 2024, the board of directors announced that Chad E. Crow had been named as the Association's new chief executive officer. He comes to the Association with over 21 years of farm credit experience and began his tenure on April 8, 2024.

On February 27, 2023, Bartley T. Harris, chief executive officer, resigned from the Association, and J. Matthew Walden succeeded Mr. Harris as interim chief executive officer. Mr. Walden served in this capacity through April 7, 2024.

Ronnie H. Sellers, senior vice president and chief credit officer of the Association, retired on January 15, 2023. Upon his retirement, Bobby Spinks was promoted to chief credit officer, and Chris Griffith was promoted to chief risk officer. Together, they oversee the credit and lending departments of the Association.

Economic Conditions

The Association continues to fulfill its mission to support agriculture and rural communities by providing access to reliable and consistent credit amid financial and macroeconomic volatility driven by factors such as elevated interest rates and inflationary pressures. Despite the challenging operating environment, credit quality at the Association has remained strong at 99.8% acceptable credit quality. Volatility in risk ratings is likely to remain a concern in the near future due to the persistence of inflationary pressure, the relatively high cost of debt and an underlying recession risk.

According to the U.S. Bureau of Labor Statistics (BLS), the Consumer Price Index for All Urban Consumers (CPI) increased by 3.0% for the 12-month period ending June 2024, remaining above the Federal Reserve's long-term target of approximately 2.0%. However, the rate of increase in the CPI decreased month-over-month (MOM) from 3.3%, remaining unchanged from the same period a year ago. Since July 2023, the Federal Open Market Committee (FOMC) has maintained the target federal funds rate within the 5.25 – 5.50% range. At the June 2024 meeting, the FOMC stated that it does not expect it will be appropriate to reduce the target federal funds rate until it has gained greater confidence that inflation is moving sustainably toward 2.0%. Participants were resolute in their commitment to bring inflation down to the 2.0% long-run objective while achieving maximum employment.

Data from the BLS indicates that the U.S. unemployment rate increased MOM to 4.1 % in June 2024, up from 4.0% in May and up from 3.6% during the same period a year ago. The May state unemployment rates in the Texas District ranged from a low of 2.8% in Mississippi to a high of 4.1% in Louisiana.

The West Texas Intermediate (WTI) crude oil futures price (front-month) increased from an average of nearly $77 per barrel in the first quarter to an average of about $81 per barrel during the second quarter of 2024. Additionally, the average WTI price increased by approximately 9.7% (about $7 per barrel) compared to the same period a year ago. In the July 2024 edition of the Short-Term Energy Outlook (STEO), the U.S. Energy Information Administration (EIA) estimated that the monthly average WTI spot price would be nearly $82 per barrel in 2024 and $84 per barrel in 2025, lower than the estimates provided a quarter ago. The WTI spot price closed above $81 per barrel in June 2024.

On June 28, 2024, the U.S. Department of Agriculture (USDA) released its 2024 acreage report. This annual report states that farmers are estimated to plant 91.5 million acres of corn in 2024, down approximately 3.3% from last year but up about 1.4 million acres (1.6%) from the estimate provided in the March 2024 Prospective Plantings report. Soybean planted area for 2024 is estimated at 86.1 million acres, up 3.0% from last year but down from the estimate provided in the March Prospective Plantings report. All wheat planted area for 2024 is estimated at 47.2 million acres, down about 4.7% from 2023. All cotton planted area was estimated at 11.7 million acres, about 14.1% above last year and up about 1.0 million acres (9.3%) from the March Prospective Plantings report. Overall, estimates from the June 2024 Acreage report indicate that farmers are planting more corn and cotton and fewer soybean and wheat acres than USDA projected in the March 2024 Prospective Plantings report. These estimates are derived via a survey conducted from May 30 to June 16 and are subject to change throughout the season.

According to USDA's July 2024 World Agricultural Supply and Demand Estimates (WASDE) report, average farm prices for corn, soybeans, wheat and cotton are estimated to have decreased during the 2023/24 season from a range of nearly 10.4% (cotton) to 28.9% (corn). Additionally, the prices of corn, soybeans, wheat and cotton are projected to continue to decrease but at a generally slower pace during the 2024/25 season. Projected declines range from about 7.5% for corn to 18.1% for wheat. Steer, barrow/gilt and broiler prices are projected to increase year-over-year (YOY) by 6.4%, 0.9% and 2.3%, respectively, in 2024, while turkey prices are projected to decline by an average of 31.7%. Subsequently, steer and turkey prices are projected to increase YOY in 2025 by about 2.2% and 11.8%, respectively.

Front-month random length lumber futures prices decreased during the second quarter of 2024 by about 17.8%, leading to a YOY decline of about 11.7% in June 2024.

According to a report issued in June 2024 by the Climate Prediction Center from the National Weather Service (NWS), La Niña is favored to develop with a 65% chance during July through September and to continue into winter 2024-25 (85% chance). Similarly, the seasonal temperature outlook indicates that above-normal temperatures are expected for most of the Texas District from July through September 2024. In terms of the precipitation outlook, Louisiana, Mississippi, Alabama and part of eastern Texas are expected to receive above normal precipitation, while West Texas and most of New Mexico are expected to experience below normal precipitation.

Agricultural producers and processors are expected to face several risk factors during 2024, including volatile commodity prices, high input costs, export market disruptions, geopolitical challenges and adverse weather conditions. The Association's loan portfolio is well-supported by industry diversification and conservative advance rates. Additionally, a high percentage of the Association's borrowers primarily rely on non-farm sources of income to repay their loans.

Loan Portfolio

The Association makes and services loans to farmers, ranchers, rural homeowners and certain farm-related businesses. The Association's loan volume consists of long-term farm mortgage loans, production and intermediate-term loans, and farm-related business loans with maturities ranging from one to 30 years. These loan products are available to eligible borrowers with competitive variable and fixed interest rates. Loans serviced by the Association offer several installment payment cycles, the timing of which usually coincides with the seasonal cash-flow capabilities of the borrower. In addition, the Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with Farm Credit Administration regulations. In June 2024, the Association entered into the Agri-Access program offered by Compeer, which required a capital investment in AgriBank of $757,110, as shown on the Consolidated Balance Sheet.

Total loans outstanding at June 30, 2024, including nonaccrual loans and sales contracts, were $1,041,774,253 compared to $1,007,539,164 at December 31, 2023, reflecting an increase of 3.4%. Nonaccrual loans as a %age of total loans outstanding were 0.03% at June 30, 2024, compared to 0.04% at December 31, 2023.

The Association recorded $0 in recoveries and $0 in charge-offs for the quarter ended June 30, 2024, and $3,677 in recoveries and $0 in charge-offs for the same period in 2023. The Association's allowance for loan losses was 0.1% and 0.1% of total loans outstanding as of June 30, 2024, and December 31, 2023, respectively.

Agribusiness Loan Program

The Association utilizes the Mississippi Development Authority's Agribusiness Enterprise Loan Program (ABE) to lower the cost of financing for its borrowers. The ABE loan program is designed to provide a %age of low-cost state financing that is combined with private financial lending institutions' loan proceeds to encourage loans to the agribusiness industry in the state.

The Association guarantees payment of the borrower's ABE loan to the Mississippi Development Authority (MDA) and, therefore, the amount of ABE loans outstanding and due to MDA is included in "Loans" on the consolidated balance sheet with an offsetting liability at "Guaranteed obligations to government entities." ABE loans totaled $11,835,242 and $10,596,794 as of June 30, 2024 and December 31, 2023, respectively.

Risk Exposure

High-risk assets include nonaccrual loans, loans that are past due 90 days or more and still accruing interest and other property owned. The following table illustrates the Association's components and trends of high-risk assets.

	June 30, 2024		December 31, 2023	
	Amount	**%**	Amount	%
Nonaccrual	**$ 360,965**	**100.0%**	$ 424,283	100.0%
Total	**$ 360,965**	**100.0%**	$ 424,283	100.0%

Results of Operations

The Association had net income of $4,327,146 and $8,240,187 for the three and six months ended June 30, 2024, as compared to net income of $4,786,719 and $8,789,937 for the same periods in 2023, reflecting a decrease of 9.6% and 6.3%, respectively. Net interest income was $6,144,724 and $12,206,065 for the three and six months ended June 30, 2024, compared to $5,707,779 and $11,316,620 for the same periods in 2023.

	Six Months Ended			
	June 30, 2024		June 30, 2023	
	Average Balance	**Interest**	Average Balance	Interest
Loans	**$ 1,004,434,551**	**$ 26,535,110**	$ 938,395,983	$ 21,860,022
Interest-bearing liabilities	**862,952,331**	**14,329,045**	801,862,295	10,543,402
Impact of capital	**$ 141,482,220**		$ 136,533,688	
Net interest income		**$ 12,206,065**		$ 11,316,620

	2024 Average Yield	2023 Average Yield
Yield on loans	**5.31%**	4.70%
Cost of interest-bearing liabilities	**3.34%**	2.65%
Interest rate spread	**1.97%**	2.05%
Net interest income as a percentage of average earning assets	**2.44%**	2.43%

	Six Months Ended June 30, 2024 vs. June 30, 2023		
	Increase (decrease) due to		
	Volume	**Rate**	**Total**
Interest income - loans	**$ 1,542,638**	**$ 3,132,450**	**$ 4,675,088**
Interest expense	**805,475**	**2,980,168**	**3,785,643**
Net interest income	**$ 737,162**	**$ 152,282**	**$ 889,445**

Interest income for the three and six months ended June 30, 2024, increased by $2,351,011 and $4,675,088, respectively, or 21.0% and 21.4%, from the same periods of 2023, primarily due to increases in yields on earning assets and an increase in average loan volume outstanding. Interest expense for the three and six months ended June 30, 2024, increased by $1,914,066 and $3,785,643, respectively, or 34.9% and 35.9%, from the same periods of 2023 due to an increase in interest rates coupled with an increase in average debt volume. Average loan volume for the second quarter of 2024 was $1,012,198,649 compared with $942,270,632 in the second quarter of 2023. The average net interest rate spread on the loan portfolio for the second quarter of 2024 was 1.96%, compared with 2.03% in the second quarter of 2023.

Noninterest income for the six months ended June 30, 2024, decreased by $1,075,796, or 34.2%, compared with 2023, due primarily to a decrease in accrued patronage income receivable of $1,290,089, partially offset by the receipt of a refund from the FCSIC of $269,779.

Noninterest expenses for the six months ended June 30, 2024, increased by $120,989, or 2.1%, compared with 2023. The main drivers of the change were increased salaries and benefits of $186,236, primarily due to adding additional staff; occupancy and equipment costs of $51,870 due to additional costs related to administrative office renovations that took place in the first half of 2023; and purchased services costs of $70,141 due to additional professional services incurred during the first half of the year. These increases are partially offset by a decrease in the Farm Credit System Insurance Corporation (FCSIC) insurance premiums of $265,123.

The Association's return on average assets for the six months ended June 30, 2024, was 1.57% compared with 1.81% for the same period in 2023. The Association's return on average equity for the six months ended June 30, 2024, was 9.75% compared with 10.89% for the same period in 2023. The declines in both ratios are due to the significant reduction in accrued patronage income from the Farm Credit Bank of Texas (Bank) at June 30, 2024 versus June 30, 2023.

Liquidity and Funding Sources

The Association secures the majority of its lendable funds from the Bank, which obtains its funds through the issuance of System-wide obligations and with lendable equity. The following schedule summarizes the Association's borrowings.

		June 30, 2024		December 31, 2023
Note payable to the Bank	**$**	**886,960,194**	$	857,631,905
Accrued interest on note payable		**2,542,211**		2,235,271
Total	**$**	**889,502,405**	$	859,867,176

The Association operates under a general financing agreement (GFA) with the Bank. The current GFA is effective through September 30, 2026. The primary source of liquidity and funding for the Association is a direct loan from the Bank. The outstanding balance of $886,960,194 as of June 30, 2024, is recorded as a liability on the Association's balance sheet. The note carried a weighted average interest rate of 3.55% at June 30, 2024. The indebtedness is collateralized by a pledge of substantially all of the Association's assets to the Bank and is governed by the GFA. The increase in note payable to the Bank and related accrued interest payable since December 31, 2023, is directly related to the Association's increase in outstanding loan volume that occurred in the first two quarters of 2024. The Association's own funds, which represent the amount of the Association's loan portfolio funded by the Association's equity, were $139,645,167 at June 30, 2024. The maximum amount the Association may borrow from the Bank as of June 30, 2024, was $1,044,494,600 as defined by the GFA. The indebtedness continues in effect until the expiration date of the GFA, which is September 30, 2026, unless sooner terminated by the Bank upon the occurrence of an event of default, or by the Association, in the event of a breach of this agreement by the Bank, upon giving the Bank 30 calendar days' prior written notice, or in all other circumstances, upon giving the Bank 120 days' prior written notice.

The liquidity policy of the Association is to manage cash balances to maximize debt reduction and to increase accrual loan volume. This policy will continue to be pursued during 2024. As borrower payments are received, they are applied to the Association's note payable to the Bank.

The Association will continue to fund its operations through direct borrowings from the Bank, capital surplus from prior years and borrower stock. It is management's opinion that funds available to the Association are sufficient to fund its operations for the coming year.

Capital Resources

The Association's capital position increased by $8,358,728 at June 30, 2024, compared to December 31, 2023. The Association's debt as a ratio of members' equity was 5.20:1 as of June 30, 2024, compared to 5.33:1 as of December 31, 2023.

Farm Credit Administration regulations require the Association to maintain minimums for various regulatory capital ratios. New regulations became effective January 1, 2017, which replaced the previously required core surplus and total surplus ratios with common equity tier 1, tier 1 capital, and total capital risk-based capital ratios. The new regulations also added tier 1 leverage and unallocated retained earnings and equivalents (UREE) ratios. The permanent capital ratio continues to remain in effect, with some modifications to align with the new regulations. As of June 30, 2024, the Association exceeded all regulatory capital requirements.

Significant Recent Accounting Pronouncements

Refer to Note 1 – "Organization and Significant Accounting Policies" in this quarterly report for disclosures of recent accounting pronouncements which may impact the Association's consolidated financial position and results of operations and for critical accounting policies.

Relationship With the Farm Credit Bank of Texas

The Association's financial condition may be impacted by factors that affect the Bank. The financial condition and results of operations of the Bank may materially affect the stockholder's investment in the Association. The Management's Discussion and Analysis and Notes to Financial Statements contained in the 2023 Annual Report of Mississippi Land Bank, ACA more fully describe the Association's relationship with the Bank.

The annual and quarterly stockholder reports of the Bank are available free of charge, upon request. These reports can be obtained by writing to Farm Credit Bank of Texas, Corporate Communications, P.O. Box 202590, Austin, Texas 78720, or by calling (512) 483-9204. The accompanying notes are an integral part of these combined financial statements.

NOTE 1 — ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES:

The Mississippi Land Bank, ACA (Agricultural Credit Association), referred to as the Association, is a member-owned cooperative that provides credit and credit-related services to or for the benefit of eligible borrowers/stockholders for qualified agricultural purposes. The Association serves the counties of Alcorn, Attala, Benton, Bolivar, Calhoun, Chickasaw, Choctaw, Clay, Coahoma, DeSoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Noxubee, Oktibbeha, Panola, Pontotoc, Prentiss, Quitman, Sunflower, Tallahatchie, Tate, Tippah, Tishomingo, Tunica, Union, Webster, Winston and Yalobusha in the state of Mississippi. The Association is a lending institution of the Farm Credit System (the System), which was established by Acts of Congress to meet the needs of American agriculture.

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. (GAAP) for interim financial information. Accordingly, they do not include all of the disclosures required by GAAP for annual financial statements and should be read in conjunction with the audited financial statements as of and for the year ended December 31, 2023, as contained in the 2023 Annual Report to Stockholders.

In the opinion of management, the unaudited financial information is complete and reflects all adjustments, consisting of normal recurring adjustments, necessary for a fair statement of results for the interim periods. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year ending December 31, 2024. Descriptions of the significant accounting policies are included in the 2023 Annual Report to Stockholders. In the opinion of management, these policies and the presentation of the interim financial condition and results of operations conform with GAAP and prevailing practices within the banking industry.

The consolidated financial statements comprise the operations of the ACA and its wholly owned subsidiaries. The preparation of these consolidated financial statements requires the use of management's estimates. The results for the quarter ended June 30, 2024, are not necessarily indicative of the results to be expected for the year ended December 31, 2024. Certain amounts in the prior period's financial statements have been reclassified to conform to current financial statement presentation.

Recently Adopted Accounting Pronouncements

In December 2023, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2023-09 - Income Taxes: Improvements to Income Tax Disclosures. The amendments in this standard require more transparency about income tax information through improvements to income tax disclosures primarily related to the rate reconciliation and income taxes paid information. The amendments in this standard require qualitative disclosure about specific categories of reconciling items and individual jurisdictions that result in a significant difference between the statutory tax rate and the effective tax rate. The amendments are effective for annual periods beginning after December 15, 2025.The adoption of this guidance is not expected to have a material impact on the Association's financial condition, results of operations or cash flows.

In November 2023, the FASB issued ASU 2023-07 - Segment Reporting: Improvements to Reportable Segment Disclosures. The standard requires a public entity to disclose, on an annual and interim basis, the following:

- significant segment expenses that are readily provided to the chief operating decision maker ("CODM") and included in segment profit or loss,
- composition and aggregate amount of other segment items, which represent the difference between profit or loss and segment revenues less significant segment expenses,
- the title and position of the CODM, and
- an explanation of how the CODM uses the reported segment measures in assessing segment performance and deciding how to allocate resources.

Even if a public entity has a single reportable segment, it is required to provide all disclosures set forth in the standard and all existing segment disclosures. The amendments in the standard are to be applied retrospectively to all prior periods presented and are effective for fiscal years beginning after December 31, 2023, and interim periods within fiscal years beginning after December 15, 2024. Early adoption is permitted. The Association is currently assessing the potential impact of this standard on its disclosures.

NOTE 2 — LOANS AND ALLOWANCE FOR CREDIT LOSSES ON LOANS:

A summary of loans follows:

Loan Type	June 30, 2024 Amount	December 31, 2023 Amount
Production agriculture:		
Real estate mortgage	**$ 824,958,184**	$ 805,054,121
Production and intermediate-term	**151,045,712**	135,561,230
Agribusiness:		
Processing and marketing	**28,162,882**	29,377,711
Farm-related business	**8,664,604**	6,279,928
Loans to cooperatives	**1,202,598**	1,202,598
Rural residential real estate	**14,492,276**	14,456,857
Communication	**4,160,118**	5,233,754
Water and waste-water	**3,591,088**	4,876,623
Energy	**2,996,791**	2,996,342
Agricultural export finance	**2,500,000**	2,500,000
Total	**$ 1,041,774,253**	$ 1,007,539,164

The Association purchases or sells participation interests with other parties in order to diversify risk, manage loan volume and comply with Farm Credit Administration regulations.

The following table presents information regarding the balances of participations purchased and sold at June 30, 2024:

	Other Farm Credit Institutions		Non-Farm Credit Institutions		Total	
	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold
Agribusiness	$ 26,304,128	$ 3,224,764	$ -	$ -	$ 26,304,128	$ 3,224,764
Real estate mortgage	-	8,319,903	16,465,625	-	16,465,625	8,319,903
Communication	4,160,118	-	-	-	4,160,118	-
Water and waste-water	3,591,088	-	-	-	3,591,088	-
Energy	2,996,791	-	-	-	2,996,791	-
Agricultural export finance	2,500,000	-	-	-	2,500,000	-
Production and intermediate-term	1,826,008	2,309,564	-	-	1,826,008	2,309,564
Total	$ 41,378,133	$ 13,854,231	$ 16,465,625	$ -	$ 57,843,758	$ 13,854,231

The Association is authorized under the Farm Credit Act to accept “advance conditional payments” (ACPs) from borrowers. To the extent the borrower’s access to such ACPs is restricted and the legal right of setoff exists, the ACPs are netted against the borrower’s related loan balance. Unrestricted advance conditional payments are included in other liabilities. ACPs are not insured, and interest is generally paid by the Association on such balances. Balances of ACPs were $8,369,186 and $10,603,463 at June 30, 2024, and December 31, 2023, respectively.

Credit Quality

Credit risk arises from the potential inability of an obligor to meet its payment obligation and exists in our outstanding loans, letters of credit and unfunded loan commitments. The Association manages credit risk associated with the retail lending activities through an analysis of the credit risk profile of an individual borrower using its own set of underwriting standards and lending policies, approved by its board of directors, which provides direction to its loan officers. The retail credit risk management process begins with an analysis of the borrower’s credit history, repayment capacity, financial position and collateral, which includes an analysis of credit scores for smaller loans. Repayment capacity focuses on the borrower’s ability to repay the loan based on cash flows from operations or other sources of income, including off-farm income. Real estate mortgage loans must be secured by first liens on the real estate (collateral). As required by Farm Credit Administration regulations, institutions that make loans on a secured basis must have collateral evaluation policies and procedures. Real estate mortgage loans may be made only in amounts up to 85% of the original appraised value of the property taken as security or up to 97% of the appraised value if guaranteed by a state, federal, or other governmental agency. The actual loan to appraised value when loans are made is generally lower than the statutory maximum %age. Loans other than real estate mortgage may be made on a secured or unsecured basis.

The Association uses a two-dimensional risk rating model based on an internally generated combined System risk rating guidance that incorporates a 14-point probability of default rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default. Probability of default is the probability that a borrower will experience a default during the life of the loan. The loss given default is management’s estimate as to the anticipated principal loss on a specific loan assuming default occurs during the remaining life of the loan. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower or the loan is classified nonaccrual. This credit risk rating process incorporates objective and subjective criteria to identify inherent strengths, weaknesses and risks in a particular relationship. The Association reviews, at least on an annual basis or when a credit action is taken, the probability of default category.

Each of the probability of default categories carries a distinct %age of default probability. The probability of default rate between one and nine of the acceptable categories is very narrow and would reflect almost no default to a minimal default %age. The probability of default rate grows more rapidly as a loan moves from acceptable to other assets especially mentioned and grows significantly as a loan moves to a substandard (viable) level. A substandard (non-viable) rating indicates that the probability of default is almost certain. These categories are defined as follows:

- Acceptable — assets are expected to be fully collectible and represent the highest quality,
- Other Assets Especially Mentioned (OAEM) — assets are currently collectible but exhibit some potential weakness,
- Substandard — assets exhibit some serious weakness in repayment capacity, equity, or collateral pledged on the loan,
- Doubtful — assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing facts, conditions and values that make collection in full highly questionable, and
- Loss — assets are considered uncollectible.

The following table presents credit quality indicators by loan type and the related principal balance as of June 30, 2024:

June 30, 2024	Term Loans Amortized Cost by Origination Year 2024	2023	2022	2021	2020	Prior	Revolving Loans Amortized Cost Basis	Total

Accrued interest receivable on loans of $14,990,632 and $18,191,757 at June 30, 2024 and December 31, 2023 have been excluded from the amortized cost of loans and reported separately in the Consolidated Balance Sheet. The Association has not written off any accrued interest receivable for the three and six months ended June 30, 2024 and 2023.

The following table reflects nonperforming assets, which consist of nonaccrual loans, accruing loans 90 days or more past due and other property owned and related credit quality statistics:

	June 30, 2024	December 31, 2023
Nonaccrual loans:		
Real estate mortgage	**$ 171,766**	$ 207,650
Production and intermediate-term	**189,199**	216,633
Total nonaccrual loans	**360,965**	424,283
Total nonperforming assets	**$ 360,965**	$ 424,283
Nonaccrual loans as a percentage of total loans	**0.03%**	0.04%
Nonperforming assets as a percentage of total loans and other property owned	**0.03%**	0.04%
Nonperforming assets as a percentage of capital	**0.21%**	0.26%

The following tables provide the amortized cost for nonaccrual loans with and without a related allowance for loan losses, as well as interest income recognized on nonaccrual during the period:

	June 30, 2024			**Interest Income Recognized**	
	Amortized Cost with Allowance	**Amortized Cost without Allowance**	**Total**	**For the Three Months Ended June 30, 2024**	**For the Six Months Ended June 30, 2024**
Nonaccrual loans:					
Real estate mortgage	$ -	$ 171,766	$ 171,766	$ -	$ -
Production and intermediate-term	189,199	-	189,199	-	-

Loans to cooperatives	-	-	-	1,202,598	1,202,598	-
Total	$ 821,631	$ -	$ 821,631	$ 1,006,717,533	$ 1,007,539,164	$ -

A loan is considered collateral dependent when the borrower is experiencing financial difficulty and repayment is expected to be provided substantially through the operation or sale of the collateral. The collateral dependent loans are primarily real estate mortgage and rural residential real estate loans.

Loan Modifications to Borrowers Experiencing Financial Difficulties

The following table shows the amortized cost basis at the end of the respective reporting period for loan modifications granted to borrowers experiencing financial difficulty, disaggregated by loan type and type of modification granted.

	For the Three and Six Months Ended June 30, 2024		
	Payment Deferral	**Total**	**Percentage of Total by Loan Type**
Production and Intermediate-Term	**$ 189,199**	**$ 189,199**	**100%**
Total	**$ 189,199**	**$ 189,199**	**100%**

Accrued interest receivable related to loan modifications granted to borrowers experiencing financial difficulty as of the three and six months ended June 30, 2024, were $0 and $0, respectively. There were no loan modifications for the same periods in 2023.

The following table describes the financial effect of the modifications made to borrowers experiencing financial difficulty during the three and six months ended June 30, 2024.

	Financial Effect
	For the Three and Six Months Ended June 30, 2024
	Payment Deferral
Production and Intermediate-Term	Term extented for 45 days

The following table sets forth the amortized cost of loans to borrowers experiencing financial difficulties that defaulted during the three and six months ended June 30, 2024, and received a modification in the twelve months before default:

	Payment Deferral
Production and intermediate-term	$ 189,126
Total	**$ 189,126**

The following table sets forth an aging analysis of loans to borrowers experiencing financial difficulty that were modified during the twelve months prior to June 30, 2024:

	Payment Status of Loans Modified in the Past 12 Months		
	Current	30-89 Days Past Due	90 Days or More Past Due
Production and intermediate-term	$ -	$ -	$ 189,126
Total	**$ -**	**$ -**	**$ 189,126**

There were no additional commitments to lend to borrowers experiencing financial difficulty whose loans have been modified during the three and six months ended June 30, 2024.

There were no instances of borrowers experiencing financial difficulty that were modified on or after January 1, 2023, the date of adoption of CECL, through June 30, 2023.

Allowance for Credit Losses

The credit risk rating methodology is a key component of the Association's allowance for credit losses evaluation and is generally incorporated into the Association's loan underwriting standards and internal lending limits. In addition, borrower and commodity concentration lending and leasing limits have been established by the Association to manage credit exposure. The regulatory limit to a single borrower or lessee is 15% of the Association's lending and leasing limit base but the Association's boards of directors have generally established more restrictive lending limits.

A summary of changes in the allowance for credit losses by portfolio segment are as follows:

	Real Estate Mortgage	Production and Intermediate-Term	Agri-business	Communi-cations	Energy and Water/Waste Disposal	Rural Residential Real Estate	Inter-national	Total
Allowance for credit losses on loans:								
Balance at March 31, 2024	$ 1,085,550	$ 207,029	$ 32,064	$ 10,940	$ 4,529	$ 28,550	$ 934	$ 1,369,596
Provision for credit losses/(Credit loss reversal)	82,804	22,380	(3,229)	(5,918)	(570)	(1,000)	(105)	94,362
Balance at June 30, 2024	$ 1,168,354	$ 229,409	$ 28,835	$ 5,022	$ 3,959	$ 27,550	$ 829	$ 1,463,958
Allowance for credit losses on unfunded commitments:								
Balance at March 31, 2024	$ 42	$ 7,027	$ 10,875	$ 67	$ 723	$ 10	$ 517	$ 19,261

Balance at June 30, 2023	$ 2	$ 5,833	$ 8,840	$ 299	$ 1,021	$ 13	$ 301	$ 16,309

Discussion of Changes in Allowance for Credit Losses

The ACL increased $192,729 to $1,484,131 at June 30, 2024, as compared to $1,291,402 at December 31, 2023. This is largely due to increased outstanding loan volume of 4.3% offset by a reduction in the impact due to the implementation of the 2024 District probability of default curve. A smaller impact on the increase was due to more pessimism in economic scenarios compared to year-end. Lastly, the Association recorded a qualitative reserve due to downgrades of significant loan volume in the month of June 2024, while the calculation was performed on the May 2024 portfolio.

NOTE 3 — CAPITAL:

The Association's board of directors has established a Capital Adequacy Plan (Plan) that includes the capital targets that are necessary to achieve the Association's capital adequacy goals as well as the minimum permanent capital standards. The Plan monitors projected dividends, equity retirements and other actions that may decrease the Association's permanent capital. In addition to factors that must be considered in meeting the minimum standards, the board of directors also monitors the following factors: capability of management; quality of operating policies, procedures and internal controls; quality and quantity of earnings; asset quality and the adequacy of the allowance for losses to absorb potential loss within the loan and lease portfolios; sufficiency of liquid funds; needs of an Association's customer base; and any other risk-oriented activities, such as funding and interest rate risk, potential obligations under joint and several liability, contingent and off-balance-sheet liabilities or other conditions warranting additional capital. At least quarterly, management reviews the Association's goals and objectives with the board.

The following table presents the components of capital:

	June 30, 2024	December 31, 2023
Capital stock and participation certificates	**$ 4,291,380**	$ 4,168,360
Accumulated other comprehensive loss	**167,429**	171,907
Retained earnings[1]	**169,662,258**	161,422,072
Total Capital	**$ 174,121,067**	$ 165,762,339

[1] Retained earnings for the year ended December 31, 2023, reflects an increase of $8,090 from the cumulative effect of a change in accounting principle for CECL on January 1, 2023.

Regulatory Capitalization Requirements

Risk-adjusted:	Regulatory Minimums wih Buffer	**As of June 30, 2024**	As of December 31, 2023
Common equity tier 1 ratio	7.00%	**14.39%**	14.77%
Tier 1 capital ratio	8.50%	**14.39%**	14.77%
Total capital ratio	10.50%	**14.52%**	14.88%
Permanent capital ratio	7.00%	**14.41%**	14.79%
Non-risk-adjusted:			
Tier 1 leverage ratio	5.00%	**14.74%**	15.10%
UREE leverage ratio	1.50%	**14.33%**	14.69%

The Association's accumulated other comprehensive income (loss) relates entirely to its non-pension other postretirement benefits. Amortization of prior service (credits) cost and of actuarial (gain) loss are reflected in “Salaries and employee benefits” in the Consolidated Statements of Comprehensive Income. The following table summarizes the change in accumulated other comprehensive income (loss) for the six months ended June 30:

	2024	2023
Accumulated other comprehensive income (loss) at January 1	**$ 171,907**	$ 221,426
Amortization of prior service (credit) costs included in salaries and employee benefits	**(1,597)**	(6,146)
Amortization of actuarial (gain) loss included in salaries and employee benefits	**(2,881)**	(8,322)
Other comprehensive income (loss), net of tax	**(4,478)**	(14,468)
Accumulated other comprehensive income (loss) at June 30	**$ 167,429**	$ 206,958

NOTE 4 — INCOME TAXES:

Mississippi Land Bank, ACA and its subsidiary, Mississippi, PCA, are subject to federal and certain other income taxes. The Association operates as a cooperative that qualifies for tax treatment under Subchapter T of the Internal Revenue Code which, under specified conditions, allows the Association to exclude from taxable income amounts distributed as qualified patronage dividends in the form of cash, stock or allocated retained earnings. Provisions for income taxes are made only on those taxable earnings that will not be distributed as qualified patronage dividends.

Deferred taxes are recorded at the tax effect of all temporary differences based on the assumption that such temporary differences are retained by the institution and will, therefore, impact future tax payments. A valuation allowance is provided against deferred tax assets to the extent that it is more likely than not (more than 50% probability), based on management’s estimate, that they will not be realized. For the six months ended June, 2024 and 2023, the Association carried a deferred tax asset of $280,035 and $147,240, respectively, with a full valuation allowance recorded against the net asset.

NOTE 5 — FAIR VALUE MEASUREMENTS:

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability. See Note 13 in the 2023 Annual Report to Stockholders for a more complete description.

Assets and liabilities measured at fair value on a recurring basis are summarized below:

June 30, 2024	**Fair Value Measurement Using**			**Total Fair**
	Level 1	**Level 2**	**Level 3**	**Value**
Assets:				
Assets held in non-qualified benefits trusts	**$ 5,012**	**$ -**	**$ -**	**$ 5,012**
Total assets	**$ 5,012**	**$ -**	**$ -**	**$ 5,012**

December 31, 2023	Fair Value Measurement Using			Total Fair
	Level 1	Level 2	Level 3	Value
Assets:				
Assets held in non-qualified benefits trusts	$ 4,801	$ -	$ -	$ 4,801
Total assets	$ 4,801	$ -	$ -	$ 4,801

Assets and liabilities measured at fair value on a non-recurring basis for each of the fair value hierarchy values are summarized below:

June 30, 2024	**Fair Value Measurement Using**			**Total Fair**
	Level 1	**Level 2**	**Level 3**	**Value**
Assets:				
Loans	**$ -**	**$ -**	**$ 72,004**	**$ 72,004**

December 31, 2023	Fair Value Measurement Using			Total Fair
	Level 1	Level 2	Level 3	Value
Assets:				
Loans	$ -	$ -	$ 99,438	$ 99,438

The Association also participates in letters of credit to satisfy the financing needs of its borrowers. These letters of credit are irrevocable agreements to guarantee payments of specified financing obligations. At June 30, 2024, the Association had $216,782 in outstanding standby letters of credit and $542,992 in outstanding commercial letters of credit, all issued primarily in conjunction with participation loans.

Uncertainty of Fair Value Measurements

With regard to nonrecurring measurements for impaired loans and other property owned, it is not practicable to provide specific information on inputs, as each collateral property is unique. The Associations utilize appraisals to value these loans and other property owned and take into account unobservable inputs, such as income and expense, comparable sales, replacement cost and comparability adjustments.

Valuation Techniques

As more fully discussed in Note 2 to the 2023 Annual Report to Stockholders, authoritative guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following represent a brief summary of the valuation techniques used for the Association's assets and liabilities. For a more complete description, see the 2023 Annual Report to Stockholders.

Assets Held in Nonqualified Benefits Trusts

Assets held in trust funds related to deferred compensation and supplemental retirement plans are classified within Level 1. The trust funds include investments that are actively traded and have quoted net asset values that are observable in the marketplace.

Loans Evaluated for Impairment

For certain loans evaluated for impairment under FASB impairment guidance, the fair value is based upon the underlying collateral since the loans are collateral-dependent loans for which real estate is the collateral. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, a majority of these loans have fair value measurements that fall within Level 3 of the fair value hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

Other Property Owned

Other property owned is generally classified as Level 3 of the fair value hierarchy. The process for measuring the fair value of the other property owned involves the use of independent appraisals and other market-based information. Costs to sell represent transaction costs and are not included as a component of the asset's fair value. As a result, these fair value measurements fall within Level 3 of the hierarchy.

Cash

For cash, the carrying amount is a reasonable estimate of fair value.

Loans

Fair value is estimated by discounting the expected future cash flows using the Association's current interest rates at which similar loans would be made to borrowers with similar credit risk. The discount rates are based on the Association's current loan origination rates as well as management's estimates of credit risk. Management has no basis to determine whether the fair values presented would be indicative of the value negotiated in an actual sale and could be less.

For purposes of estimating fair value of accruing loans, the loan portfolio is segregated into pools of loans with homogeneous characteristics. Expected future cash flows, primarily based on contractual terms, and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

The fair value of loans in nonaccrual status that are current as to principal and interest is estimated as described above, with appropriately higher interest rates which reflect the uncertainty of continued cash flows. For collateral-dependent impaired loans, it is assumed that collection will result only from the disposition of the underlying collateral.

Standby Letters of Credit

The fair value of letters of credit approximates the fees currently charged for similar agreements or the estimated cost to terminate or otherwise settle similar obligations.

Commitments to Extend Credit

The fair value of commitments is estimated using the fees currently charged for similar agreements, taking into account the remaining terms of the agreements and the creditworthiness of the counterparties. For fixed-rate loan commitments, estimated fair value also considers the difference between current levels of interest rates and the committed rates.

NOTE 6 — EMPLOYEE BENEFIT PLANS:

The following table summarizes the components of net periodic benefit costs for the six months ended June 30:

	Other Benefits	
	2024	2023
Service cost	**$ 3,342**	$ 7,077
Interest cost	**39,131**	35,556
Amortization of prior service (credits) costs	**(1,597)**	(6,146)
Amortization of net actuarial (gain) loss	**(2,881)**	(8,321)
Net periodic benefit cost	**$ 37,995**	$ 28,166

The Association's liability for the unfunded accumulated obligation for these benefits at June 30, 2024, was $1,469,746 and is included in other liabilities on the balance sheet.

The components of net periodic benefit cost other than the service cost component are included in the line item "Other components of net periodic postretirement benefit cost" in the income statement.

The structure of the District's defined benefit pension plan (DB Plan) is characterized as multiemployer since the assets, liabilities and cost of the plan are not segregated or separately accounted for by participating employers (Bank and associations). The Association recognizes its amortized annual contributions to the plan as an expense. The annual contribution is paid in January with the expense amortized monthly to the "Salaries and employee benefits" line item on the consolidated statement of comprehensive income. The remaining unamortized amount is included in "Other assets" on the consolidated balance sheet.

The following table represents DB Plan contributions made, amounts amortized into expense and the remaining unamortized contribution amounts as of June 30:

	2024	2023
DB Plan contribution	**$ 135,502**	$ 229,645
Year-to-date amortization	**(67,751)**	(114,822)
Remaining contribution	**$ 67,751**	$ 114,823

NOTE 7 — COMMITMENTS AND CONTINGENT LIABILITIES:

The Association is involved in various legal proceedings in the normal course of business. In the opinion of legal counsel and management, there are no legal proceedings at this time that are likely to materially affect the Association.

NOTE 8 — SUBSEQUENT EVENTS:

The Association has evaluated subsequent events through August 9, 2024, which is the date the financial statements were issued. One nonaccrual loan with an amortized cost of $189,126 was sold to a third-party at a foreclosure sale on July 17, 2024. As a result, the Association charged off $31,749, reversed interest income of $13,628 and reversed a specific allowance of $117,195.
